

MICHAEL M. HONDA
17TH DISTRICT, CALIFORNIA

**Greetings from Congressman Michael M. Honda on the
Occasion of Silicon Valley Technology Innovation &
Entrepreneurship Forum 2013**

November 2, 2013

It gives me great pleasure to welcome everyone to the Silicon Valley Technology Innovation & Entrepreneurship Forum 2013.

Silicon Valley Technology Innovation & Entrepreneurship Forum 2013 (SVIEF) is an international conference, which builds economic relations between the United States and China by promoting the growth of businesses and technology locally and abroad. The conference gathers technology and business leaders to provide a stage for discussions on tech innovations and capital. Today's event is the 3rd annual SVIEF conference featuring keynote speeches from former Vice President Al Gore and Apple's co-founder Steve Wozniak, as well as discussions of recent industry trends and high-tech investment hotspots.

On behalf of the residents of the 17th Congressional District, I thank today's organizers for putting together today's venue and offer my best wishes for its success.

Sincerely,

Michael M. Honda
Member of Congress
